

USB Meter Data

About

Brand: RuiDeng

Model: AT34

version: 1.4

Sourcing

Distributor: Amazon

Part No: B08JPZF4Y5

Product Description

Specification:

Brand: RuiDeng

Model: AT34

Display screen: 0.96" color IPS display

Voltage measurement range: 3.70-30.00V

Voltage measurement resolution: 0.01V

Current measurement range: 0-4.000A

Current measurement resolution: 0.001A

Capacity accumulation range: 0-99999mAh

Energy accumulation range: 0-99999mWh-999.99Wh

Voltage measurement accuracy: $\pm(0.8\% + 4 \text{ digits, under } 25^{\circ}\text{C})$

Load impedance range: 1-9999.9 Ω

Power measurement range: 0-120W

Temperature range: 0-80 C / 32-176 F

Temperature measurement error: $\pm 3 \text{ C} / \pm 6 \text{ F}$

Working temperature range: 0-45 C / 32-113 F

Refresh rate: 2Hz

Dimensions: Approx. 64*22*12 mm / 2.5*0.9*0.5 inch

Weight: Approx. 27g

Package Included:

1 x USB Tester

About this item

- Compatible: USB tester is widely used for quality inspection of 3C digital peripheral products, and is the first choice for digital gamers and electronic enthusiasts. Widely compatible with AT24, support QC2.0, QC3.0, APPLE 2.4A / 2.1A / 1A / 0.5A, Andriod DCP, SAMSUNG fast charging protocol identification.
- Full function: USB tester is suitable for Samsung fast charging protocol identification, let you know the charging status of the phone. Power-off storage to ensure data: AT34 has a power-off storage function, which can store capacity and power data when the mobile power supply is cut off, which is convenient for subsequent viewing and convenient for the capacity and energy measurement of the mobile power supply.
- Professional manufacturing: at a glance, real-time detection of changing status, voltage, current, power and other data. High brightness, long life. Professional instruments are used to sample the circuit, and a unique precise algorithm is used to ensure the accuracy and stability of the product at the hardware and software level. The shell is made of high-quality PC material, with high strength and good transparency.
- Real-time monitoring: real-time detection of device charging status, voltage, current, power and other indicators at a glance; measuring voltage: 3.7 without power-down storage function cannot test capacity and energy.
- Multi-function: The USB Ammeter Tester AT34 uses a 0.96 inch IPS high-definition color LCD display to display the charging status, voltage, current, capacity, energy, power, equivalent impedance, temperature and other indicators of the device at first glance. 160 degree wide viewing angle, high brightness, long service life. Fast charging recognition.
