

Filter replacement steps:

Solder Fume Extractor Instruction for Use (HJ-1238)

Thank you for purchasing. Please read this manual carefully before use, and Please keep it in a safe place for future reference.

Dear customer,

Thank you for choosing our product. Our HJ-1238 fume extractor absorbs and captures fumes from solder, flux, chemicals, gases and helps to reduce unwanted odors and smells in your working spaces

Please read these instructions for use carefully and observe the information they contain.

With kind regards,
Your MUIN Team

Safety notes:

Read these instructions for use carefully. Non-observance of the following information may result in personal injury or damage. Store these instructions for use and make them accessible to other users. Make sure to include these instructions for use when handing over the device to third parties.

WARNING

Keep packaging material away from children! There is a choking hazard.

Electric shock

WARNING

As with every electrical device, use this fume extractor carefully and cautiously, in order to avoid hazards due to electric shock.

- For this reason, do not operate the device
 - at voltages other than those indicated on the device (the type plate is located on the inside of the fan unit),
 - if the device or accessories are visibly damaged,
 - during a thunderstorm.
- In the case of defects or operational faults, switch off the device immediately and disconnect the device from the mains socket. Do not pull on the mains cable or on the device to disconnect the plug from the socket. Never hold or carry the device by the mains cable. Keep the cables away from hot surfaces.

- Ensure that the fan of the fume extractor and the mains cable do not come into contact with water, steam or other liquids.
- Use the device only in dry internal rooms (e.g. never in the bath, sauna).
- Never reach for a device that has been submerged in water. Disconnect it from the mains immediately.
- Do not use the device if it or its accessories are visibly damaged.
- Do not subject the device to any impacts or drop the device.

Repairs

WARNING

- Only specialist personnel may perform repairs on electrical devices. In the case of repairs, please contact customer service.
- Do not open the fan unit.
- If the power cable of the device is damaged, it must be replaced by the manufacturer.

Risk of fire

WARNING

There is a risk of fire if the device is used improperly or these instructions for use are ignored.

Therefore, observe the following instructions for using the fume extractor:

- Never use the device underneath a cover, such as blanket, pillow, etc.
- Never use the device near petrol or other highly flammable substances.

Handling

IMPORTANT

The device must be switched off and disconnected from the mains every time after use and before cleaning.

- Do not place any objects in device openings or in rotating parts. Make sure that the moving parts can move freely at all times.
- Do not place any objects on the device.
- Do not expose the device to high temperatures.

Disposal

Observe the local regulations for material disposal. If you have any questions, please contact the local authorities responsible for waste disposal.
