STATEMENT

Thank you for purchasing raydrop product that has been tested to meet our stringent quality standards. This product has a raydrop warranty for 12 months from the date of purchase.

Please email us with your Order ID and problem or issue, we will respond within 24 hours.

Please read the User Manual thoroughly. Clean and maintain the product as instructed. If any abnormalities occur, please refer to the Troubleshooting Guide first.

This warranty is void if the defect is caused by accidental damage, misuse, abuse, neglect, improper repair or alteration by unauthorized persons, or a failure to follow operating instructions provided with the product including adding essential oils directly into the tank and base. This warranty does not apply to normal wear and tear or commercial use.

In no event shall liability exceed the purchase price paid by the purchaser of the product. Under no circumstances shall there be a liability for any loss - direct, indirect or incidental - or consequential damage arising out of, or in connection with the use of the product.

SAFETY INSTRUCTIONS

The humidifier was made with safe and environment friendly materials, it has been certified and complied with the requirement of sale regions' related regulations or laws.

IMPORTANT: Please read and save these **SAFETY INSTRUCTIONS** before using the device. Basic precautions should always be followed to reduce the risk of fire, electrical shock, and injury to persons or damage to the product.

BEFORE USING THE HUMIDIFIER

1.Do not use the humidifier if the cord has been damaged. Please check the wires for any signs of damage.

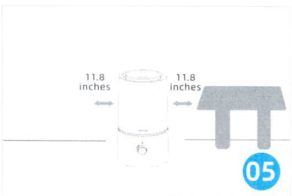

2.Do not place the humidifier in wet environments.

3.Pleas always keep the humidifier out of the reach of patients, children, and pets.

4.Please always place the unit on a smooth, flat, non-suede, non-metallic, waterproof, flat surface and avoid direct sunlight.

5.Please always place the unit 11.8 inches away from walls, other appliances, and wooden furniture.

WHEN USING THE HUMIDIFIER

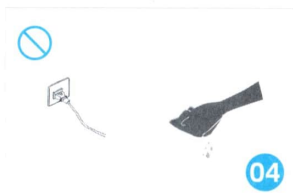

1. Do not plug the unit with wet hands.

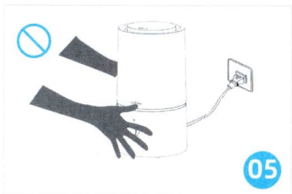

2. Do not direct the mist outlet against the wall.

3. Do not cover the mist outlet with your hand or any other objects to avoid product failure or injury, while using the humidifier.

4. Do not clean the unit when it is still connected to a power supply or is still in use.

5. Do not move or tilt the humidifier when it is still connected to a power supply or is still in use.

6. The appropriate relative humidity of the environment is 45% ~ 65%. Please adjust the mist as needed.

AFTER USING THE HUMIDIFIER

1. When the humidifier is not in use, be sure to unplug it and cut off the power.

2. The humidifier needs to be cleaned regularly.

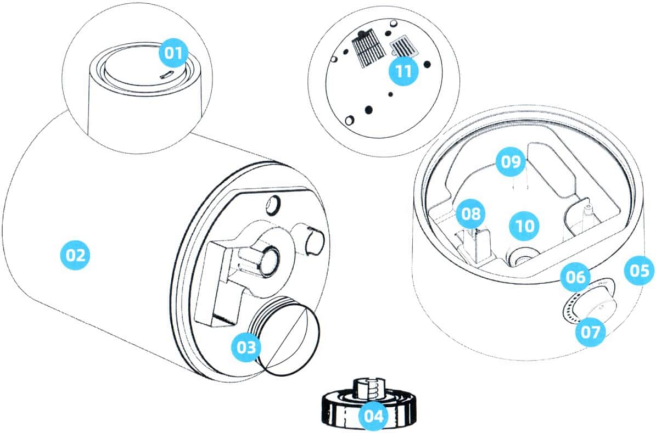

3. Do not clean the humidifier immediately after turning it off. Let the humidifier to cool thoroughly before cleaning.

4. Do not attempt to repair or adjust any electrical or mechanical functions on this humidifier. Doing so will void your warranty.

SPECIFICATIONS

Model	KC-RD03A-4L
Capacity	4L(1.06Gal)
Rated Voltage	110V~60Hz
Rated Power	9.5-16W
Covering Area	215-430ft ²

Installation Steps

1. Turn the Water Tank upside down.
2. Remove the water tank cap and fill the tank with clean and cool water only .
3. Attach the tank cap.

4. Place the tank back onto the base.
5. Plug the power cord to the socket.
6. Rotate the control knob clockwise to the ON position.

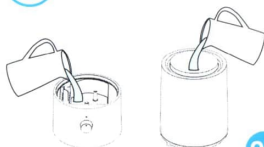

! CAUTION

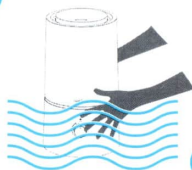

01

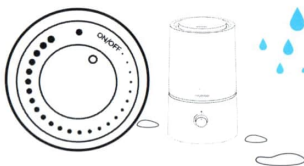

02

03

04

05

1. It is recommended to use distilled or filtered water to avoid limescale and not to use hot water.
2. Do not add any essential oils or medicinal tablets into the water tank.
3. Do not add water into the base or through mist outlet.
4. Do not submerge the base in water.
5. Do not set up on the highest setting for working all night, or there is water around the humidifier for high air humidity instead of the leaking problem.

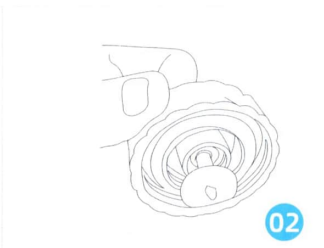

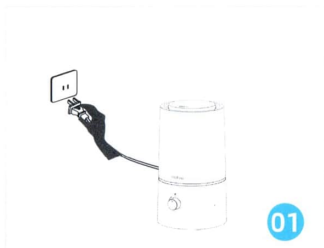

MAINTENANCE

Regular cleaning and disinfection are important to maintain the performance of your humidifier.

IMPORTANT

If the water stays in the tank for more than a day or two, there is a risk of bacterial growth.

DESCALE INSTRUCTIONS

1. Turn off and unplug the humidifier.

2. Remove the water tank from the base. Remove the tank cap. Make sure the white seal is not dislodged. Drain the water from the tank and the base.

3. Fill the tank halfway. Add a few drops of scale cleaner (or 1 tablespoon of white vinegar).

Attach the tank cap and shake the tank for 15 seconds.

4. Place the tank onto the base. Let it remain for 15-20 minutes.

05

06

5. Remove the water tank from the base. Remove the tank cap and drain the solution.

Wipe the atomizer and floater with a soft cloth to remove loosened mineral deposits.

6. Rinse the reservoir and tank until the smell of vinegar (used to remove scale) disappears.

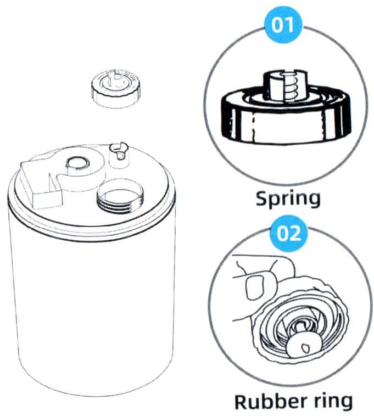

END-OF-SEASON MAINTENANCE & STORING YOUR HUMIDIFIER

1. Follow the instructions for weekly maintenance above.

2. Remove any accessories used with the humidifier and allow all parts to dry completely before storing.

3. Store the humidifier safely in a cool, dry location.

TROUBLESHOOTING

- 1.If the information listed in the troubleshooting guide can't solve your problem, please contact us for help.
- 2.Failure to keep this humidifier clean from mineral deposits may affect operation of this humidifier.
- 3.Failure of the customer to follow these instructions may void the warranty.

Problem	Possible Cause	Solution
Failed to turn on the unit.	Failed to turn on the unit.	Ensure unit is properly plugged in.
	No power from power outlet.	Try another power outlet.
Waterless indicator is constantly on.	No water in the water reservoir.	Ensure the ❶ spring is secured properly to the tank allowing water to pass through to the base.

Problem	Possible Cause	Solution
The unit is on but no mist or little mist is produced.	Not enough water inside the tank.	Refill and re-install the water tank.
	Mist level is set too low.	Adjust to larger mist output.
	The base might be overfilled.	Remove the tank, empty the base and place back the filled tank on the empty base.
	Mineral buildup on atomizer.	Put your hand towards the nozzle and feel if there is air coming out. If yes, clean the water scale on the atomizer as instructed (p11).
Tank leakage.	Tank may be damaged.	Check for possible cracks in the tank. Ask for a replacement if it is damaged.
	Tank cap is not tightened securely.	Tighten the tank cap.
	② Rubber ring was not installed on the tank cap.	Check the tank cap for rubber ring, contact us if any is missing.
	① Spring gets stuck.	Ensure the ① spring is secured properly to the tank allowing water to pass through to the base.

Problem	Possible Cause	Solution
★ Low height mist dampens surrounding desk or floor. Condensation forms around <u>humidifier</u> or on windows and walls.	Mist level is set too high for the room size.	1. Check if the room is too humid, adjust to lower mist output. 2. Open door and windows, or change to a larger room.
	Air inlet is blocked.	Humidifier should be placed on a hard flat surface, 2 feet above the floor, 12 inches away from the wall. Point mist outlet away from wall or window.
	Low indoor temperature- leads to liquefaction.	Raise the room temperature to 25°C/77°F.
Poor humidification.	Mist level is set too low for the room size.	1-1. Adjust to maximum mist output. 1-2. Close door or windows to reduce air ventilation, or change to a smaller room.
	Air inlet is blocked.	Humidifier should be placed on a hard flat surface, 2 feet above the floor, 12 inches away from the wall.
	Low indoor temperature leads to liquefaction.	Raise the room temperature to 25°C/77°F.

Problem	Possible Cause	Solution
