

## Fan accessories

### About this item

- ▶ 1 Piece fan include fan grill and mounting screws & nuts
- ▶ Rated Voltage: 12V 0.5A; Speed: 3000RPM; Air flow: 125CFM;
- ▶ Noise: 42dBA
- ▶ Bearing type: Ball Bearing ; Life: 50000 hours; Connector: XH2.54-2Pin; Cable Length: 25cm Or 9.85 inches
- ▶ Warranty: One-year quality assurance. Please contact us If the product has any quality problems, it will be replaced within one year.
- ▶ Dimension: 120mm(L) x 120mm(W) x 38mm(H) / 4.72x4.72x1.5 in. per fan

# Specification

Size:120x120x38mm

Rated Voltage:12V

Rated Current: 0.5A

Connector: XH2.54-2Pin

Speed: 3000RPM

Air flow:125CFM

Noise:42dBA

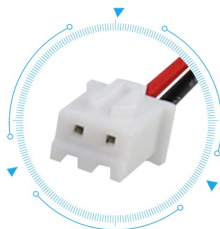

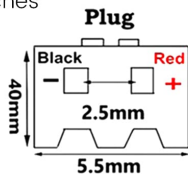

Life: 50000 hours

Weight:220g/pcs or 7.6oz

Bearing type: Dual Ball Bearing

Cable Length: 25cm Or

9.85 inches

# Operating Instructions

Thank you for choosing Wathai. Please read the following instructions before using the fans.

**Notice: Quality problems caused by non-human factors,**

**Free replacement within one year, Please contact us email ,thanks.**

Below is the two key points to make sure the DC Fan works.

1、 Make sure the power output is the same voltage as the fan.

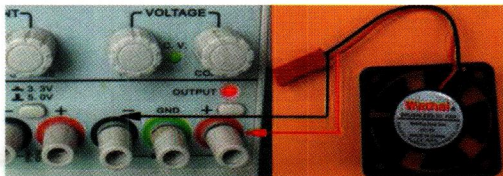

**The Power output is the same as the fan's rated Voltage**

★ Fans may burn out if the output voltage is 20% higher than the rated voltage marked on the fans .

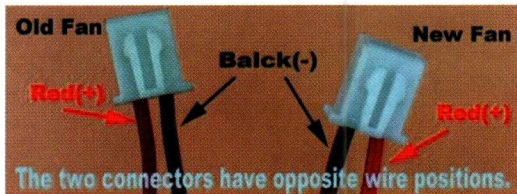

★ Fans can work but the speed will be lower under lower voltage

★ The power current must be higher than fans, or the power will burn.

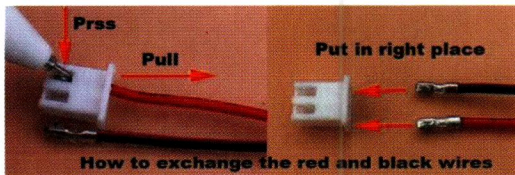

2、 Make sure the positive(+) and negative(-) poles are connected in the right places.(The red wire on the fan should be connected to positive pole while black wire connected to negative pole.)

3、 The positions of the red and black wires on the fans' connectors must be the same if you want to replace the old fan. You must exchange the wires if they are different. The following picture shows two connectors with opposite wire (red&black) positions.

4、 How to exchange the red and black wires.(positive(+)) and negative(-))Please refer to the following picture.

5、 Please contact Amazon customer service for return or replacement, so that new fans can be shipped from amazon warehouse and you can get it faster . Login your account → Help → Contact Us
