Quick Trials:

My Notes from Trials:

- Treat these notes as a quick refresh – all info found in manual
- Installation date: 2024.02.29 on windows 10 PC
- Waveforms software:
 - Install files ► STORAGE/software_engineering/2024 Waveforms
 - I selected all boxes for installation – tried subset and device not recognized
 - After connecting: view device info under Settings ► device manager
 - Version 3.21.3 64-bit
 - Waveforms by Digilent, an NI company
 - Analog Discovery no longer listed on digilent website but software still supports units.

Generate a Waveform:

- Select a frequency, type 1.05mhz to customize
- Output on Channel 1, indicated as W1 on the wiring harness
- Choose a square wave
- Verify the output with multimeter:
 - Move knob to **Hz%** selection
 - Verify frequency in main display
 - Verify duty cycle in the small display (see kaiweets model HT118A)
